

1- The line graph :-

Family income over a year can be represented the best by:

- a. Bar chart
- b. Histogram
- c. Line graph
- d. Frequency polygon

Answer: c. Line graph

27. The best graphical representation of the COVID-19 in Jordan in the past 5 months is:

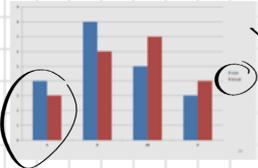

- a. Line graph
- b. Histogram
- c. Frequency polygon
- d. Pie chart
- e. Bar graph

Answer: A. Line graph

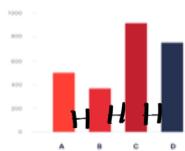

2- The Bar chart :-

البيانات تكون Qualitative and quantitative discrete

Complex table

key

يتم نفس العرزين وتمت الفراع

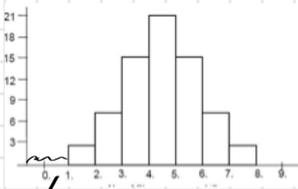

2. Bar charts are suitable for representing data of the following subtype(s) exclusively:

- a. Qualitative data
- b. Quantitative data
- c. Qualitative and quantitative discrete data
- d. Qualitative and quantitative continuous data

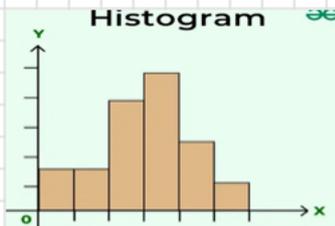

Answer: c. Qualitative and quantitative discrete data

3- The histogram :-

قبل كسور Continuous quantitative variable

Scale break

* no space between the consecutive columns

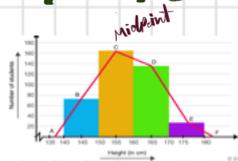

The type of data best represented by histograms is:

- a. Continuous
- b. Discrete
- c. Nominal
- d. Ordinal

Answer: a. Continuous

4- Frequency Polygon

Continuous quantitative and the table is of simple or complex type

ناتج كذا هو نقطة منتصف كل فئة مع كل اربعة

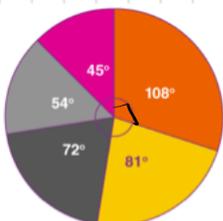

28. Linear representation of frequency distribution by joining the midpoint of class intervals is:

- a. Bar chart
- b. Frequency distribution table
- c. Pie chart
- d. Frequency polygon
- e. Histogram

Answer: D. Frequency polygon

3- The pie chart :-

All of the the 4 types of variables

تتكون بيانات

$$\text{Angle} = \frac{\text{Frequency of the category of interval} \times 360}{\text{Total frequency}}$$

3. Pie chart is consistent with all of the following except:

- a. It is used to represent quantitative data only
- b. It displays data as percentages
- c. "pie" comes from the name of each divided sector
- d. It can only represent one variable at a time

Answer: a. It is used to represent quantitative data only
