Lec: 9

**1-The Mandibular nerve (V3) leaves the skull through which foramen?**

- A. Foramen Rotundum**
- B. Foramen Spinosum**
- C. Foramen Ovale**
- D. Jugular Foramen**

**2-Which of the following nerves is the only sensory branch arising from the anterior division of the Mandibular nerve?**

- A. Masseteric nerve**
- B. Deep temporal nerves**
- C. Nerve to the lateral pterygoid**
- D. Buccal nerve**

**3The Auriculotemporal nerve arises by two roots that surround which artery?**

- A. Maxillary artery**
- B. Middle meningeal artery**
- C. Superficial temporal artery**
- D. Facial artery**

**4- The Lingual nerve is joined by a branch of the facial nerve. What is the name of this joining branch?**

- A. Lesser petrosal nerve**
- B. Chorda tympani**
- C. Nerve to mylohyoid**
- D. Auriculotemporal nerve**

**5-Which two motor branches pass through the Otic ganglion to supply the tensor tympani and tensor palati muscles?**

- A. Nervus Spinosus**
- B. Nerve to lateral pterygoid**
- C. Nerve to medial pterygoid**
- D. Deep temporal nerves**

**6-The contents of the Pterygopalatine fossa include the Maxillary nerve, the Pterygopalatine ganglion, and which other major vascular structure?**

- A. Superficial temporal artery**
- B. 3rd part of the Maxillary artery**
- C. Middle meningeal artery**
- D. External carotid artery**

C  
D  
B  
B  
C  
B
