CVS- pathology

Not related to Restrictive cardiomyopathy ?

- A. senile related
- B. helminthic infection
- C. myloma
- D. fibrosis
- E. hypertension

ANS: E

By an autopsy examination of a case of sudden death, the heart showed thinning of the ventricular wall, and the microscopic examination revealed myocyte replacement by massive fatty infiltration with mild fibrosis, the proper diagnosis is? Select one:

- a. Restrictive Cardiomyopathy
- b. Myocarditis
- c. Hypertrophic cardiomyopathy (HCM)
- d. Arrhythmogenic Right Ventricular Cardiomyopathy
- e. Dilated Cardiomyopathy

ANS: d

One of the following about DCM is false ?

The cardiac ejection fraction typically is less than 35%.

Most common tumors?

Myxoma

CVS- pathology

. A 35 years old athlete dies suddenly during running in a marathon, which of the following is the most likely underlying cause:

- A. Hypertension
- B. pulmonary embolism
- C. Stroke
- D. Hypertrophic cardiomyopathy
- E. Restrictive cardiomyopathy

Answer: D.

Choose the condition that does not cause Hypertrophic cardiomyopathies:

- A. Hypertension
- B. Aortic stenosis
- C. Amyloid diseases

ANS:C

. All the following are causes of primary cardiomyopathy except:

- A. amyloid
- B. hypertension

Answer: B

اللَّهُمَّ صَلِّ عَلَى سَيِّدِنَا مُحَمَّدٍ
