Lecture(4)

The parotid region

Done by :

Aya Ayman

Anatomy-Lecture(4)

1.All the following structures emerge from the anterior border of the parotid gland EXCEPT?

- A. Zygomatic branch of the facial nerve
- B. Transverse facial artery
- C. Cervical branch of the facial nerve
- D. Parotid duct
- E. Buccal branch of the facial nerve

ANSWER:C

2.All The following structures are related to the anteromedial surface of the parotid gland EXCEPT:

- A. the masseter muscle
- B. the facial nerve
- C. the ramus of the mandible
- D. the maxillary artery
- E. the medial pterygoid muscle

answer: b

*3.The most superficial part of parotid gland is :

- A- Facial artery.
- B- Facial nerve.
- C- Facial vein.
- D- Retromandibular vein.
- E- External carotid artery.

Answer: B

Anatomy-Lecture(4)

4. Which carry the parasympathetic nerve supply of parotid gland:

- A. Great auricular
- B. Facial nerve
- C. Middle meningeal plexus
- d. Glossopharyngeal

Note: it is the same as when we say the Preganglionic fibers

Answer:d

*5. One is wrong about parotid gland ?

- a. Nuclei are rounded & central
- b. Serous demilune
- c. Lined e short pyramidal cells
- d. Narrow lumen

Answer:b

6. The parotid gland extends superiorly into which structure?

- A. Angle of mandible
- B. Masseter
- C. Sternocleidomastoid
- D. Medial pterygoid
- E. Zygomatic arch

Answer:E
